Section 7. Terms of Reference(TOR)

1. Introduction

Gauriganga Municipality, located in Kailali District, Sudurpaschim Province aims to ensure sustainable access to safe water, sanitation, and hygiene (WASH) services for its residents. The preparation of a comprehensive WASH Plan is essential to guide the municipality in improving WASH infrastructure, service delivery, and hygiene behavior change. This ToR outlines the scope of work, objectives, and methodology for preparing the WASH Plan in accordance with the guidelines set by the Department of Water Supply and Sewerage Management (DWSSM), Nepal.

2. Background and Justification

The constitution of Nepal (2072) has embedded access to water supply and sanitation as a fundamental right of a citizen through provisions made in Article 35(4). It also ensures the access of safe water and sanitation as fundamental rights of the people. Similarly, local government institutions have mandate to formulate local level policies, guidelines and strategies for their sustainable development.

In the last 25 years, Nepal has made a significant progress in expanding the coverage of improved water supply, sanitation and hygiene (WASH) practices, setting examples in this sector. The movement of sanitation in Nepal has been accelerating well especially after the formulation of National Sanitation and Hygiene Master Plan, 2011. This is also a notable effort of all that WASH is a priority area under the 14th National Development Plan (2016-2019). As a result, the access to basic sanitation by Nepalese people has reached almost 98% till July 2018 as per the record of Department of Water Supply and Sewerage Management (DWSSM). Similarly, access to basic water supply is about 87% throughout the country. This was possible due to collective efforts of all Governments, Civil Societies, Private Sector, Development Partners, Community and other segments of the Nepali society.

Nepal has made its commitment in Sustainable Development Goal (SDG), in particular, SDG No. 6: 'Ensure availability and sustainable management of water and sanitation for all', and further in 6.1: By 2030, achieve universal and equitable access to safe and affordable drinking water for all. Nepal government has drafted WASH SDP 2016-2030 in line with SDG, Total Sanitation Guideline 2017, DRM Guidelines, and other relevant WASH sector guidelines. However, municipalities yet to be internalizes this commitment through proper long-term planning, resource mobilization and implementation of WASH programmes.

As the federalization is progressing and yet there are gaps/confusion in the national Water Supply, Sanitation and Hygiene (WASH) policies and practices the elected representatives and office bearers of the municipalities facing trouble in making strategic plans/programmes at municipalities level. Further, they have limited information on their roles and responsibilities and issues on WASH and they lack the knowledge to plan improvements to service delivery even though they are now solely responsible for providing water and sanitation facilities to the people according to the new constitution of Nepal. A critical requirement is that they should develop comprehensive WASH Plan.

as to ensure 100% coverage for potable water, in line with the national plan and SDG targets ensuring leaving no one behind. The Plan will also contribute in real planning for the sector for the investment and resource management and also a robust MIS for WASH sector. The institutional WASH services, the importance of equity and inclusion also have noticed and observed not properly applied at the ground level from all concerned stakeholders.

Justification:

WASH Plan development is a priority programme of the Government and Development Partners. It is the basis for development of water supply, sanitation and hygiene (WASH). Being a function of strong local concern and ownership, the WASH sector in the past received prominent support at the central level. With state restructuring, as enshrined in the new Constitution, the Municipalities are bound to ensure access of safe water and sanitation to every citizen. SDG and Sector Development Plan (SDP) which are systematic long-term documents, also ensure that resource mobilization commitment in each Municipality must be in place as soon as possible. Therefore, Municipalities are required to develop and implement WASH services to meet the stipulated targets and sustain them as mentioned in SDG and SDP. This also entails that WASH Plan should incorporate Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA). In this regard, the WASH Plan will be the resource planning tool for sustainable WASH sector development in Municipality level. With the help of which Municipalities will allocate budget for short-term, medium term and long-term WASH sector development and implementation so as to meet the set targets on WASH as per SDP and SDG. In addition, The WASH Plan will draw on the national and international vision documents viz. SDP of the government, Periodic Plans published by National Planning Commission, Targets of SDG, etc. and build local ownership to achieve the targets in line with those spelled out in the documents.

The WASH Plan must be doable, affordable, manageable, and implementable and to be fully owned by People/Municipalities and also follows the standard guidelines of format suggested by DWSSM so as to ensure WASH Plans of all Municipalities in the country can be harmonized/synchronized and national WASH information management system (MIS), national WASH programme/policies can be updated in line with peoples' priority.

3. Objectives:

Following are the objectives for this plan.

1. Update overall status of water, sanitation, and hygiene situation within the concerned Municipality using standard N-WASH apps and WASH Plan development Guidelines.
2. Develop long-term WASH programme in line with SDG 2030 including identification of unserved population/clusters and improvement of existing services with specific plans including mapping of required resources, as per templates approved by the Government.
3. Develop operational strategies to achieve WASH programme targets, as per consultation with the municipality.
4. Identify the possible hazards and link the plan with climate change adaptation standards.

4. Methodology and Scope of Work:

The WASH Plan is expected to create a vision and strategy at the local, and at the same time also contain broad action planning for development of WASH sector to 2030 which will be in alignment to Provincial to national vision, policy, plan and targets. It will identify sources/ discharge points, sanitation and hygiene, means, broad funding requirements, technology and channels to avail such funds, extent of public private partnership possible, etc. to realize the broader vision and targets of the local governments.

The WASH Plan will have strategies to ensure reaching the unreached, leave no one behind, improving functionality, identifying new projects to address changing demand patterns and improved levels of services for HHs/institutional level and sanitation and hygiene gaps and how can be achieved safely manages systems and services. In all of these, source protection, climate change adaptation and

disaster-resilient principles as well as issues of gender and inclusion need to be considered together with identifying other drivers of influence. The WASH Plans will be interactive and dynamic based online GIS tools and maps to support situation analysis for evidence-based planning and decision-making.

The WASH Plans will be developed using a participatory approach under the technical and partial financial support from UNICEF and leadership of the concerned Municipality in coordination with provincial as well as DWSSM, as appropriate. All developed survey questionnaires will be field tested and revised accordingly. Data collection methods and methodology will be pre-agreed with/agreed by respective Municipality.

A minimum of three consultation meetings are anticipated with concerned Municipality, for: (i) orientation, objective setting and setting work environment, (ii) reporting of data collection/setting

Priority using NWASH's costing tool and, (iii) presentation of draft report and buying general ownership for endorsement.

The Gauriganga Municipality will attempt best to translate, elaborate and tailor the plan provisions while undertaking the planning exercise. One of the main components of stake holder consultation will be to disseminate the importance of WASH priorities and localization of SDG No. 6 to local planners and decision makers, so that the principle and direction of WASH development is well understood and accounted in the planning process at local level. The Municipality during consultation meeting will identify broad principles for achieving WASH interventions but will be innovative in translating them into local plans at the appropriate levels. The Municipality will also identify if any local level plans, policies, strategies, etc. exist that will link to development of WASH services in the area. If it exists, it will be considered.

The methodology will follow WASH Plan Development Guidelines approved by DWSSM, which is available in webpage: <https://dwssm.gov.np/ne/>. The methodology should maintain certain degree of flexibility in line with local context of Municipality. However, minimum steps to be followed are elaborated below as well.

Field levels preparatory works

- Comprehensive orientation from DWSSM whereby the selected party will be introduced to the ongoing initiative on WASH Planning, NWASH tool and reporting templates and methodology. This to be followed with introductory meeting at provincial level before the respective municipalities. Orientation will include sharing of best practices from different municipalities and also sharing one completed model WASH Plan.
- Startup meeting with Municipality will be organized to share TOR, specially agreeing data collection methodology, formats for field and Table of Contents for reports submitted and field work schedule.
- Organize WASH Plan planning workshops in the Municipalities at least two times to share draft reports and final workshop to endorse the final WASH Plan.

Planning level

- Analysis of information, sharing and endorsement at ward level
- Analyze and prioritize new and rehabilitation, extension, reconstruction and service level increment needs of the existing water supply systems and sanitation systems.
- Prioritize water supply schemes for unserved communities
- Analyze sanitation and hygiene status of the communities specially in line with SDP and SDG for total sanitation and hygiene indicators
- Analyze and prioritize water and sanitation needs in schools, health care facilities and public toilets
- Analyze and prioritize community needs for drainage and solid waste management locations
- Vision formulation, local level prioritization with local government

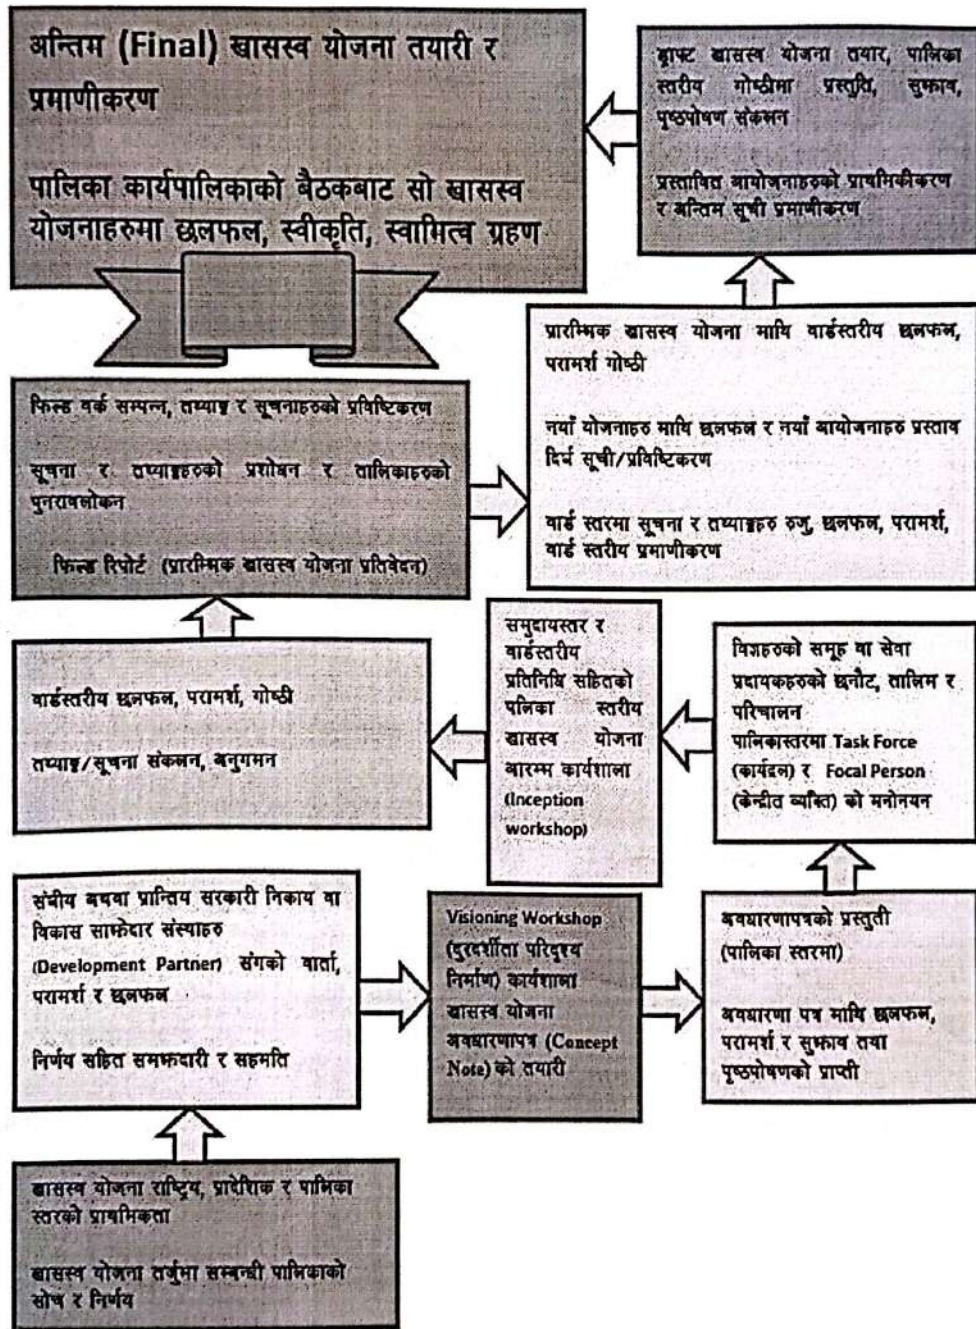

- Develop budget and resource planning using costing tool available in NWASH.
- Draft WASH plan preparation and presentation at Municipality level
- Incorporate feedback and suggestions on draft and prepare final WASH Plan with costing and implementation plan
- Submit final WASH Plan to the Municipality for approval

Minimum benchmark to be followed while formulating the WASH plan with key processes will be as below:

- Water Service Level (Safely manage/yard connection and functionality)
- Water Quality (Water Safety)
- Sanitation Service level-Post ODF and safely managed sanitation-FSM
- Hygiene-toile sanitation prospect (BCC)
- Disaster, climate change and resilience -6 Characteristics of WASH resilience
- Local mechanism, local capacity, local leadership and ownership
- Integration with health, education and livelihood
- Technological options/innovations
- Digitization of processes, systems and mechanism
- Strengthening local governance (institutional capacity)

The below Illustrative steps or the process of development WASH Plan shall be followed.

The IP(s)'s key actions will include, but not be limited to:

- Inventory of water within the Municipality with quantitative information on the population served, system characteristics, functioning status, management and operation parameters, etc. as well as qualitative information on the system sustainability and appropriateness in an interactive format based on an online GIS platform (NWASH), freely provided by MoWS/DWSSM.
- A detailed assessment of institutional WASH access services (school, health, government offices and public places) using NWASH and clear envisioning plan of action to address the equity and inclusive WASH services at institutional level including community WASH services.
- Facilitate WASH programme development workshop through consultative processes ensuring participation of all concerned duty bearers and right holders (representatives of women, marginalized, people with disabilities, local authorities, civil societies, media etc).

- The WASH plan should have clearly spoken about how to improve hygiene behaviors of the community people including Menstrual Hygiene Management (MHM) (at HHs and institutional level)
- The WASH Plan should focus on sanitation ladder when and how to achieve with the provincial and national target so that it could contribute towards SDG 2030 with clear indicators and milestone.
- The Plan should include in depth resource analysis with the relevant stakeholder's engagement, roles and responsibility, safely manage water, sanitation and hygiene with key priority actions so that Municipalities can reach to the unserved population and improvement of existing WASH services with the available resources.

PART II

Section 8. Conditions of Contract and Contract Forms

Foreword

1. Part II includes standard Contract forms for Consulting Services (a Lump-Sum Contract).
2. **Lump-Sum Contract:** This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Nevertheless, quality control of the Consultant's outputs by the Client is paramount.
